

# STRANGE BOMBS!

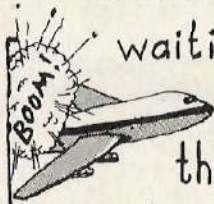

- a dream!

I remember there was a radio call from the airport control tower that said to delay

that plane and stop it from landing. But while it was waiting for permission to land, it exploded!

And suddenly all the planes began exploding!

Everytime a plane exploded, a strange thing would pop out and when they hit the ground caused tremendous explosions!

The things reminded me of fire-pin-wheels, and they fell the way some planes used to fall in the war when they got one wing shot off--they'd whirl 'round and 'round as they fell.

WHEEEEEE
